-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2627

1. Applicant's election, without traverse, of the Group II invention[Cls.1-18] in Paper dated 9/21/06 is acknowledged.

Claims 19-20 are withdrawn from further consideration by the examiner, pursuant to 37 CFR 1.142(b) as being drawn to a non-elected invention.

Applicant has further elected the species of figure 1 with indicated claims 1-15&18 readable thereon. However, upon examination of the elected species and a review of the other non-elected species, the examiner believes that the prosecution of the application will be expedited with the rejoining of the different species for examination.

Therefore the examined claims are 1-18.

2. This application is in condition for allowance except for the following formal matters:

i) In claims 1&16, the term or phrase "apart" or "formed apart" appears respectively on lines 8&11-12; the instant language is ambiguous. It is suggested that in both instances the language be replaced with the phrase --spaced apart--.

[The abstract would also be clearer if a similar change is made to it. See line 7.]

ii) In addition, in claim 6, line 7, the phrase "same side" is awkward and unclear because the structure and/or orientation

Art Unit: 2627

of the intermediate layer has not been sufficiently claimed to identify any side to which the 'same side' refers.

iii) The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The Title should provide a more detailed structural identification of the feature or features which distinguish the invention from the prior art.

The intended results produced by the structural differences can also be part of the content of the Title but should be made subordinate to the structural differences.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Araki shows a sensing device remote from the air bearing surface.

Art Unit: 2627

4. If applicant has filed an information disclosure statement and this instant office action does not contain an initialed-off copy (or copies) of all such filed IDS's (or at least a comment to the disposition of such IDS'S in the body of the office action itself) applicant should apprise the examiner of such missing documentation [to the IDS's] in response to this office action so that the examiner can take appropriate action to supply same to the applicant.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to A. J. HEINZ whose telephone number is (571) 272-7587. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, DWAYNE BOST can be reached on (571)272-7023.

The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
